

Agricultural Chemical Usage

Postharvest

Symbol and Selected Data Item Definitions

- - Represents zero
- (D) Withheld to avoid disclosing data for individual farms.
- (Z) Less than half of rounding unit for data item shown (see data item definition for rounding unit)

Pesticide Use:

Applications, Measured In Lb: Total pounds of pesticide active ingredient class (fungicide, insecticide, other), or pesticide active ingredient, applied to postharvest crops during the marketing year.

Rounding unit: 100 lb

Applications, Measured In Lb/1,000 Bu/Application, Avg : Rate per application (in lb per 1,000 bushels), average of all positive responses. Rounding unit: 0.001 lb

Applications, Measured In Lb/1,000 Bu/Year, Avg: Rate per marketing year (in lb per 1,000 bushels), average of all positive responses. Rounding unit: 0.001 lb

Applications, Measured In Number, Avg: Number of applications per marketing year, average of all positive responses. Rounding unit: 0.1 application

Applications, Measured in Pct of Applications: Percent of applications. Rounding unit: 1 whole percent

Treated, Measured in Pct of Volume Handled, Avg: Percent of volume treated, average.

Rounding unit: 0.1 percent

Volume Handled, Measured in Bu: Volume of wheat handled, in bushels, during marketing year.

Rounding unit: 1,000 bushels

Pest Management:

Pest Mgmt, Measured in Pct of Operations: Percent of operations utilizing pest management practice.

Rounding unit: 1 whole percent
